

Dear Customer:

Every day, PECO delivers innovation and advances smart energy to provide safe, reliable, affordable and clean energy and energy services for our customers and the communities we serve.

Recently, your neighborhood qualified for a pilot program to extend natural gas service to your area. As part of this project, we will be working in your area to install new natural gas main and service lines.

**If you have not signed up to have natural gas installed at your home and are interested in learning more about the conversion process, please call 215-841-5541.**

Our work will occur in the following locations within your neighborhood:

- Hollow Rd. to Rebel Rd.
- Ridgewood Rd to Spring Hollow Rd

**Our work is scheduled to begin on the first phase of the project on February 20, 2018.**

- Work will occur from 7 a.m. to 4 p.m., Monday through Friday, on roadways, sidewalks and potentially your property.
- We will work to minimize the impact on local traffic as much as possible and flaggers will help guide traffic as needed.
- This work will be performed by **General Asphalt Paving Co. of Philadelphia**, a qualified PECO contractor.
- If you have any questions regarding this project and for scheduling purposes, please contact **Dave Seiler at 215-677-2626**

**Final restoration of all public areas, includes streets and sidewalks, usually begins within 60 days following the completion of the main and service line installation work, weather permitting.**

- We will temporarily repair any impacted areas on your property.
- All permanent restoration is the responsibility of the homeowner.

We will work to minimize the impact this project will have on you and your neighbors, and we will keep you updated on our progress.

Sincerely,

Thomas Boothroyd  
Sr. Engineer - Gas New Business  
1060 W. Swedesford Rd.
