

STAP – Sidewalk Notes – July 2007

In attendance: Judy D., Bob O., John F., Cheryl, Cindy, Hans, Jim D., Sean

Phase I Status

We talked about EK's status with Phase I of Sidewalks to Schools. Their plan so far looks a lot like our plan from last fall, except they have the sidewalk on the west side of Conestoga near Martins Lane. The group seemed to feel it would be best to have the sidewalk on both sides if it's physically possible.

We need to find out when EK is ready to meet with STAP (and then the public) to unveil the final draft plan. (Bob will ask Steve B. about these dates)

There was some concern about the "depressed curb" at the corner by the dentist office. (Bob will monitor the situation)

We could also use a blown up version of the Phase I map to display at the Tredyffrin 300 Day, along with handouts for the public. (John F. will look into this)

Phase II Status

We decided to include the following segments in Phase II:

- 1) Conestoga Rd, from Keller to Margo (no change to last year's plan)
- 2) Howellville Rd, from Bodine to Irish (no change to last year's plan)
- 3) Valley Forge Rd, from Anthony Wayne to Walker (move from west side to east)
- 4) Crosswalk and connector from Anthony Wayne to Gateway near Lukoil (NEW item)
- 5) Irish Rd, from Lizbeth to Greene (NEW item, this was swapped in and Walker Rd, from Prussian to Thomas was swapped out)
- 6) The corner of Howellville Road and Old Lancaster next to TEMS (NEW item)
- 7) The corner of E. Central and N. Valley near the Delaware Valley Friends School (Bob will approach the local business owners about funding this)

'08 Budget Request

The last number we heard from EK was \$2million for Phase I construction. With the assumption that Phase II planning will be about \$200K, we will ask the Board of Supervisors for \$2.2 million for '08.

In order to assure inclusion in the '08 budget, we decided that both Mr. Lamina and Mr. Kampf should be contacted personally and informed about the plan. (Molly was assigned this task, but Sean is willing to help)

The other Supervisors should also be informed. (Volunteers?)

Overall Plan

The 5-year plan and the 2021 plan need to be modified to reflect changes described above. (Sean will do this with the help of Erin on GIS)

Mimi and Dave Brill need to be contacted to see if money can be set aside (possibly from bonds) for the overall plan. (Judy will talk to Mimi and Dave)

School Board

The School Board facilities committee will be meeting in August where they will discuss their contribution to the Phase I project. They will be informed that the overall cost for Phase I is about \$2million and the amount of linear feet of sidewalk on school property is about 20%. (Sandi will bring this up)

Sandi's term with the School Board will be over this year. She will remain with STAP (we hope), but we will need a new liason to the School Board - possibly Liane Davis. (Hopefully, Sandi can bring this up in August too)

Andy Dinniman

Andy Dinniman addressed the township in July and will do it again in August and September. Members of STAP are encouraged to attend these meetings. It would be helpful if he was informed about our general plan, and made aware that we could use some State funding in '08 for Phase I. (Sean will attend the September meeting, and Molly (I think) will attend the August meeting)
