

Tredyffrin Township Field Usage Information

Field Scheduling and Reservations

- All groups/teams larger than 15 require a Field/ Facility Usage permit
- All for profit organizations (Charging a fee for instructions) require a Field/Facility Usage Permit
- Field Permits are issued by seasonal block (spring, summer, fall) weekly camp permits and single event/game permits
- All Field/Facility permits are issued by Public Works Coordinator, 610-408-3626
- Information, permit applications and fees are available at www.tredyffrin.org

Field Monitoring Information

(The policies and procedures for opening/closing fields and notifying teams and the public)

- Field closed notification will be sent out by e-mail to all schools, groups and organizations holding permit for Township Fields only when the Township determines the fields are not playable. (If you do not receive an e-mail the fields are open). It is the permit holder's responsibility to share the information with their coaches, players and families. Closed notification will also be posted on Township website's home page; www.tredyffrin.org
- Fields closed signs will be posted if the field has been determined to be non-playable. When a field is determined to be playable the Field closed sign will be closed.
- Any group/team found playing on a Field that has been closed will be given one warning; any further offense will result in the group/ teams permit being pulled for that field.

Field Usage Tips

- Use common sense... If a field has standing water, if you hear squishing when walking in the grass or your footprints are left behind in the infields the field is too wet to play
- During practice move the goal areas to avoid excessive wear in the goal mouth areas
- Move around your drills as much as possible during practices
- The last field user for each day is asked to remove all equipment from the field for mowing purposes (goals, nets, tackling sleds etc)
- Remember you are not the only group/team using the fields, if you play on a wet field causing damage to the field many groups/teams will be affected

Field Maintenance (Grooming) Tip

- Do not rake/sweep infield mix out of the infield and into the grass, this causes a sharp lip on the infield and creates dangerous bad hops
- Do not remove wet infield mix from the infield in an effort to dry infield, loosen, rake and level the wet area.
- Do not use kitty litter, mulch or wood chips to assist with drying
- At the conclusion of all games/practices baseball/softball infields are to be raked
- All field users are responsible for collecting all litter and garbage from the fields and depositing in trash receptacles
