Tredyffrin Township

- Incorporated in 1707
- 4 Septa Regional Rail Stops
- 7 Board of Supervisors
- Population: 29,332
- Median Household Income: $122,427
- Square Miles of Land: 19.8
- Housing Units: 12,697
- Median Housing Price: $499,200
- 0% Earned Income Tax Rate & Gross Receipts Tax
- One of the Lowest Tax Rates in the Region
- Acres of Preserved Open Space: 520
- Portion of Township Dedicated to Open Space: 8%
- Acres of Parks and Recreational Facilities: 334
- Total Road Miles: 150
- Owned By Township: 107
- Owned By State: 43

“Tredyffrin” comes from the Welsh word “tre(f),” meaning “town”, joined to “dyffryn,” which means “wide, cultivated valley.”

    - Mark Sheppard
I am honored to present to you the 2018 Tredyffrin Township Annual Report. In an effort to provide more information to our residents and businesses, we initiated this report last year.

Each year our departments perform thousands of daily tasks that keep our Township the best to place to live and work. Often, they go unseen or unnoticed, but they are central to the hard work by our staff to keep Tredyffrin Township the special place that it is.

This report will highlight each department and just a snapshot of the highlights for year 2018. It was another year with many achievements – from park improvements, to sanitary sewer work to continued commercial investment in the Township. It was also the year that Township completed the sale of the Valley Creek Trunk Sewer system after years of negotiations with our municipal partners. This sale allows us to focus on sanitary sewer work in our Township which will begin in 2019.

Please take the time to see just some of the important work done on behalf of the Board of Supervisors and you, the residents. We take great pride in serving you and come to work each day inspired to meet the challenges that lay ahead.

For more information on any of the departments or services Tredyffrin Township provides, please visit www.tredyffrin.org.

William F. Martin
Township Manager

2018 Board of Supervisors

Heather Greenberg – Chairman
Murph Wysocki – Vice-Chairman

*Resigned
A great deal of the Department’s responsibilities include administering, preparing, and maintaining the provisions of the Zoning and Subdivision & Land Development Ordinances. Following these codes, which are adopted by the Board of Supervisors, will ensure orderly, attractive development with the goal of preserving a great quality of life for our residents and workers alike.

Another key component to this Department is reviewing, issuing, and inspecting building permits for both residential and commercial properties, keeping in mind long-term safety. All these roles are related to economic development and keeping the Township a thriving place to live and work.

In addition to our daily responsibilities, such as code enforcement, there have been many new projects developed in the Township. Below are some recent examples.

**Target** in Devon opened in October 2018 to great excitement. This smaller-scale store sits right next to the Acme offering residents a great option for both household and grocery needs at one location.

**Station Square** is conveniently located adjacent to the Paoli train station and is well under way. The project will eventually contain 153 one and two-bedroom apartments, fitness center, club room, multi-media entertainment room, and a co-working space. Parking is surface and below grade. Residents will be able to take both SEPTA and Amtrak to downtown Philadelphia, New York City, and beyond. Expected completion is mid-2020.

**Permits and Office Building Sales**

The Township continues to see solid financial investment in both residential and, particularly, commercial buildings. Liberty Property Trust sold the last of their buildings and Pitcairn is very close to selling their 1.8 million square feet of Class A Chesterbrook office space. This suggests that property owners have a strong desire to build in and improve these buildings in Tredyffrin Township. In 2018, construction dollars totaled more than $68 million and this Department issued more than 2,700 building permits.

2691 Permits Issued

$68,000,000 Construction Dollars invested in the Township

Click Here to View Our New Interactive Zoning Map
The Engineering Department provides engineering technical knowledge, expertise, and assistance to all Township departments, the Township Manager, and the Board of Supervisors. The Department manages and oversees a variety of functions from permitting/inspections (stormwater and grading, Municipal Separate Storm Sewer System (MS4), sanitary sewer planning, land development project inspections, etc.) to capital infrastructure projects, as well as ordinance development (stormwater, floodplain, etc.), grant procurement, attendance at public meetings, resident inquiry/complaint investigation/follow-up, expert testimony, and other various Township related engineering efforts. In addition to daily responsibilities, the Engineering Department started and/or completed several capital infrastructure projects in 2018.

**Howellville Road Bridge Replacement**
Work continued on a project that includes removal and replacement of the existing roadway bridge over the Norfolk-Southern railroad tracks near the Field of Dreams and Berwyn PECO complex along Howellville Road. Final design was completed. The Township also received structural adequacy approvals from Pennsylvania Department of Transportation (PADOT), a Public Utilities Commission (PUC) Secretarial Letter for the project, as well as continued working with Norfolk-Southern on railroad approvals for the Final Bridge Replacement Design Plans and Agreements. Construction is expected to begin in 2019, once all Easements and Agreements have been finalized. The project is funded by the Municipal Bridge Retro-Reimbursement Program (MBRP) from the Delaware Valley Regional Planning Commission (DVRPC) and PADOT, as well as funds from the Township and Norfolk-Southern. Once completed, the new bridge will provide a wider bridge deck with two minimum 10-ft lanes, and two 5-ft shoulders (30-ft in total) versus the existing 19.5-ft width, which will allow for safer movement of motorists, bicyclists, and other users.

**Crabby Creek Stormwater Retrofit Project**
Three stormwater retrofit projects were installed in the upper portions of Crabby Creek in the Berwyn and Paoli areas of the Township. Stormwater Best Management Practices (BMPs) were constructed, which will collect and infiltrate stormwater runoff from sections of Friendship Drive, Hilltop Road, and Daylesview Lane in upper portions of the Crabby Creek watershed. Runoff entering Crabby Creek ultimately flows into Little Valley and then Valley Creek and through Valley Forge National Historical Park on its way to its confluence with the Schuylkill and Delaware Rivers. Reducing runoff volume and rate of flow downstream into Crabby Creek will help slow down erosion of the stream bed and banks, as well as reduce downstream flooding, and help with supplying the stream with baseflow during dry weather periods. This project was funded from a number of third party grants, from the Valley Creek Trustee Council (VCTC), Schuylkill River Heritage Area (SRHA), as well as the Pennsylvania Department of Environmental Protection (PADEP) Growing Greener Program. Design and bidding were completed in 2017 and construction was completed last summer.

**Sanitary Sewer Pump Station Rehabilitation Projects**
Work was completed on design, permitting, and bidding for the Station Avenue Pump Station in Berwyn. This is one of the Township’s older pump stations, and the proposed project provided several upgrades to the station, including new pumps, electrical equipment, and internal components at the station. A contractor was approved by the Board of Supervisors and a Notice to Proceed was issued for the project. In 2019, the Township will oversee the construction of these improvements. In addition to the Station Avenue Pump Station, work began on design for rehabilitation work on two other Sanitary Sewer Pump Stations - the Lancaster Avenue and the Glenn Avenue locations. Design and permitting will be completed in 2019 for construction in 2020 at these pump stations. These rehabilitation projects will provide improvements and better operational controls at the pump stations and will reduce the frequency of routine and emergency maintenance currently required at these older facilities.
Stormwater Inspections and Damage Assessments from the Abnormal Rainfall in 2018

The Township experienced an abnormally wet year with over 70-inches of rainfall recorded at the Valley Creek USGS Gage near Valley Forge Park. Typically, we experience about 42-inches of rainfall in an average year. The rainfall, at times, seemed relentless and unyielding and during the second half of the year, we actually received more than a typical year’s worth of rain. Heavy rainfall impacted infrastructure, roadways, and properties throughout Tredyffrin. Several stream culverts were overtopped during the extreme storm experienced on August 13th. Pugh Road between West Valley and Valley Forge Roads was closed until temporary repairs were made to the roadway. In addition, design work began to replace the existing old dual pipe culverts which were impacted from high flood flows. Construction work to install a new culvert is planned for 2019. In addition, the Department worked closely with Public Works as they responded to numerous repairs to sanitary sewer and storm pipe infrastructure impacted by 2018 storms. Finally, portions of the Township saw an uptick in the number of sinkholes following the heavy summer rains. Staff worked with property owners as they planned repairs to sinkholes.

Bridges

The Township starting planning to rehabilitate or replace the Drummers Lane Bridge over Trout Creek. Design is expected to begin in 2019, with construction to follow. Additionally, staff coordinated with PADOT on their repairs and rehabilitation to the Old Lancaster Road Bridge over AMTRAK in Berwyn. Staff also continue to coordinate with PADOT as they continue design work on the proposed Darby Road Bridge and intersection improvements planned to begin in Paoli in 2021.

East Central Avenue Multi-Modal Improvements

A project that consisted of numerous pedestrian improvements including new sidewalks and ADA ramps (south side), raised crosswalks, pavement markings, signage, and bike lanes (north and south sides) along East Central Avenue in Paoli. The Township also resurfaced East Central Avenue. The project was funded with a Transportation Alternatives Program Grant from DVRPC and PADOT, as well as Tredyffrin Township. The project was constructed in 2017, and final punch list items, including the placement of pavement markings and crosswalks was completed in Spring 2018. These improvements provide enhanced pedestrian and bicycle mobility and safety for the residents living, commuting, and enjoying recreational activities in this area of Paoli.

Stormwater Pollution Reduction Plan (PRP) and Municipal Separate Storm Sewer System (MS4)

A new and upgraded permit application and plan was submitted to PADEP in December 2017 which will replace an existing permit and add new requirements to what the Township and numerous other local municipalities will be required to do over the next 5 years to manage stormwater runoff and reduce pollutant loading into the various streams and watersheds within the Township’s municipal boundaries. Tredyffrin has the following watersheds which will require PRP pollution reduction measures: Crum Creek, Darby Creek, Little Valley/Valley Creek, Trout Creek, and Gulph Creek. The Township will be planning and implementing a variety of stormwater measures, such as street sweeping and inlet cleaning, stormwater ordinance compliance, retrofitting existing stormwater basins, streambank stabilization, and implementing green infrastructure to help manage and reduce sediment pollution from existing MS4 drainage areas. Staff coordinated with PADEP on our 2017 permit submission, and we are still awaiting comments and final approval of the MS4 Permit and PRP Plan in 2019. The Township also continues to have coverage under our previous MS4 Permit and an MS4 Annual Report was submitted to PADEP in 2018.
Mission
The mission of the Finance Department is to lead the Township’s financial management efforts to best serve the public, Board of Supervisors, and all Departments of the Township. We serve as a central hub for financial information involving Township business in a timely, efficient, and effective manner. The Finance Department provides reports, maintains documentation, and ensures the integrity and accuracy of the Township’s financial transactions in accordance with Generally Accepted Accounting Principles (GAAP), Township ordinances, state statutes and federal laws.

Responsibilities
The Finance Department oversees several functions relative to Township revenues, including the billing and collection of Real Estate Taxes, Local Service Tax, and the Sewer Utility Fee. We are responsible for Financial and Cash Management, Accounting, Purchasing, Benefits, and Risk Management. The Human Resources Department is also a function of the Finance Department.

Bond Rating
The Township continues to maintain a Moody’s Aaa Bond Rating, which is the highest possible rating and speaks to the Township’s historic track record of sound financial management. Tredyffrin Township is one of only thirteen Pennsylvania municipalities with this rating. As a result of our high bond rating, the Township is able to obtain the most favorable interest rates available on any debt issued.

Fund Balance
For the Year Ending December 31, 2017, the Township maintained an “Unassigned” Fund Balance of $18,527,116 – which represents 83.7% when viewed as a percentage of the total 2019 Budgeted Expenditures. For context, the Government Finance Officers Association (GFOA) recommends having between 15% and 18% of your annual budget in reserves. From a practical standpoint, this illustrates the Township’s ability to manage annual expenses with long-term financial stability.

Budget Preparation
The Finance Director worked closely with the Township Manager and Board of Supervisors to prepare the 2019 Operating Budget and the 2019-2023 Capital Plan. The budget serves as the guide for the Township’s overall operations and delivers transparency and accountability to our residents and businesses. The General Fund Operating Budget for FY2019 is $22,128,195. For the first time since 2013 the Township adopted a final budget which included a tax increase. The tax increase totaled 2%, raising the millage rate to 2.427 mils. Even with a small tax increase the Township’s portion of a resident’s overall tax bill remains at 8%. The average 2019 real estate tax bill for a residential property is $551.20.
Goals:
In addition to continuous process improvements, it is the goal of the Finance Department to prepare a Comprehensive Annual Financial Report (CAFR) to present to the Board of Supervisors and GFOA. Preparing a CAFR represents the highest level of financial reporting for municipalities and we are hopeful to accomplish this goal within the next couple of years.

2018 Accomplishments
The Finance Department was busy during 2018. We fully implemented our Sewer Utility Billing Module in our General Ledger. This was a huge success and our Sewer Clerk, Bev McNally worked hard to get everything ready prior to issuing the sewer bills last year. Additionally, the Township led the way in completing the sale of the Valley Creek Trunk Sewer for $28.3M. The entire process, which started in 2016 culminated with closing on December 19, 2018.

Current Projects
Beginning in early 2019 the Finance Department will implement new financial software, Whitebirch by PFM. This software is a multi-year planning platform which will help the Township plan for future years more easily. We plan to deploy this new software to aid in capital planning, future debt needs, and impacts on future budgets that any new initiatives that the Board of Supervisors are considering. The Finance Department is hopeful to have the software fully implemented by the end of February.
The Department’s responsibilities include maintaining the network infrastructure, which consists of multiple servers and client workstations. In addition to this, the team maintains the VOIP system, police MDVR system, AV equipment, security system, and anything technology related. This would include rendering support to the end users when it comes to their software and printer needs.

In addition to our daily responsibilities, we completed various projects in 2018 but this report will only touch on two of these. Our first project was transitioning our on-premise SharePoint server to a Microsoft cloud-based SharePoint solution. The contrast with platforms and in overall performance is a vast improvement.

The old SharePoint version is pictured above whereas the new cloud based is pictured below.
This solution also allows for us to share out specific folders and files in a secure manner with read only or edit permissions. We are using this for the “Do Not Solicit” requests, so all approved solicitors can access a restricted read only document that is always up to date with the latest revisions live in the field. Another benefit is that we will no longer need to worry about checked out files and manually checking them in so others can access them. This system performs auto updates and does not require that each file is checked out manually while still retaining a history of individuals that accessed each file.

Our second project which is still in progress involves virtualizing our servers. This technology allows us to eliminate the need for multiple physical servers for each vendor and place them all on one “super server”. There are several benefits that come with this ability. For example, we can restore server instances (depending on size and configuration) within a few hours in case a server failure would occur. Previously, rebuilding a server could take weeks as you had to wait for physical parts from the manufacturer, then install the O/S, and restore from a viable backup.

### What is vCenter Server?

vCenter Server allows you to manage multiple ESX/ESXi hosts and the virtual machines on them. Because these environments can grow very large, vCenter Server provides useful management tools like the ability to organize the hosts and virtual machines into clusters with vSphere DRS and vSphere HA. Multiple vCenter Server systems can be managed by the vSphere Web Client so that their individual inventories can be presented and managed under one “pane of glass”.

Any vCenter Server systems for which you have privileges and that have been registered with the Lookup Service, or added manually with the vCenter Registration Tool in the Administration section, will appear in your inventory to the left.

### Basic Tasks

- [Create a folder](#)
- [Create Datacenter](#)

### Explore Further

- Learn more about folders
- Learn about datacenters

Virtualization also helps us have smaller footprint and reduces the electric bill, as it eliminates the necessity for multiple pieces of electronics. This project started in 2018 and is slated for completion during the first quarter of 2019.
Tredyffrin Township Television (TTTV) operates our own PEG Television channels and facilities. This includes equipment and programming for Comcast and Verizon TV channels, as well as video-on-demand website. The studio exists to provide Township residents with the tools and training needed to communicate with their neighbors via television and video-on-demand available online. The franchise agreements in place with local cable providers fund TTTV.

TTTV’s purchased the UltraNEXUS-HD X2 Hi-Definition Video Server which necessitated the purchase and installation of the Keene Hall PTZ cameras. We also purchased and installed the necessary supportive equipment such as the remote controller, signal converter and switch.

TTTV also purchased three JVC GY-HM620 cameras for offsite use. These camcorders are full HD and support HDMI, HD-SD Output. With a 23x optical zoom lens, we will be able to film events and presentations clearly and reliably.
Tredyffrin Township Libraries serve as centers of knowledge, creation, and engagement. In 2018, the Libraries provided 63 service hours each week and visits for the year totaled 222,621. More than a collection of books, the Libraries are inviting, social spaces that connect people both in person and virtually. As community hubs, they offer vital resources and services that contribute to an economically prosperous, knowledgeable and socially active world.

As the Libraries continue to support diverse interests, we continue our efforts to refine our collections, services, and programs. A total of 366,040 items were borrowed; 1,508 programs were offered; and 23,949 program attendees were recorded.

The Libraries’ professional staff assists individuals with book recommendations, online resources, financial resources, tax forms and filing information, technology resources, and much more. Last year, information assistance interactions totaled 27,615, recorded PC use sessions totaled 45,351 and librarians conducted 433 information literacy 1 on 1 sessions.

Notable 2018 Achievements

Children’s Resources and Programming
- Focused on early childhood literacy initiatives and achieved Bronze status in the PA Forward Star Library Program
- Continued programs designed to get young children ready for Pre-K and school
- Continued Bilingual Spanish story times for preschool families
- Facilitated sign language classes for kids 8 – 12 years old
- Increased outreach efforts and holding programs off-site in the community

Young Adult Resources and Programming
- Hosted theatrical and musical performances for teens, including a summer theater workshop
- Continued our annual college search and a college-essay writing and application workshop for teens and parents
- Hosted a concert to benefit Conestoga High School Student trips
- Hosted “Girls Who Code” workshops
- Hosted student interns from Conestoga High School

Adult Resources and Programming
- Expanded e-book offerings
- Continued and expanded health and wellness programs, such as yoga and meditation, taught by local instructors at little or no cost to participants
- Continued our partnership with Chester County SCORE to offer a variety of programs, workshops, and general assistance to small business owners and entrepreneurs

*Local Government Aid does not include Tredyffrin Township’s contribution for staff.
The Tredyffrin Township Police Department is comprised of 42 sworn officers and 6 civilian staff members who are all dedicated professionals, providing quality law enforcement services to the citizens of our community while adhering to the highest ethical and professional standards.

In 2018, the Department handled 22,951 documented calls for service, including 447 criminal arrests, 3,561 traffic arrests, 973 traffic crashes, and 94 DUI arrests. The daily interactions with community members and diligent enforcement efforts are a testament to the quality and caliber of the talented individuals that make up the Police Department.

Community partnerships are extremely important to us as we work to enhance safety measures, identify crime trends, and work with all our first responders in the region to make Tredyffrin safe, secure, and enjoyable.

**Crime Watch and Social Media**
The Police Department utilizes a variety of means to communicate with our residents, keeping them informed of crime trends to include Crime Watch, Twitter, and Facebook. Please follow us for information and updates. We also recommend [www.ReadyChesco.org](http://www.ReadyChesco.org), which is Chester County’s official source for emergency information and government notifications.

**Community Policing Activities**
The Department takes part in a variety of activities with the Community Policing Unit, continuously working on initiatives to enhance communication, quality of life and safety within our communities.

**Drug Take Back Initiative**
In 2018, 558 pounds of medications were collected from the Drug Take Back box located in the lobby of the Police Station. This effective disposal process has become increasingly popular within the community, as a means for residents to safely dispose of unwanted medications from their homes.

**New Hires in 2018**
Officer Rebecca Fulmer
Officer Brittany Rosenfeld
Officer Sean Munro

**Retirements in 2018**
Sgt. Todd Bereda
Officer Jim Mutter
Race for Peace
The Department remains active with the Race for Peace organization, a multi-jurisdictional group of clergy, law enforcement, and members of the community geared toward building understanding, communication, and trust between police and the community.

18th Annual Citizens Police Academy
Classes took place from September to December 2018. The class graduated in December. The Citizens Police Academy is a program designed to promote community involvement and understanding. Participants learn valuable information on topics such as DUI, Criminal and Accident Investigations, Domestic Violence, and Personal Safety. Excellent presentations are provided by the Department as well as the District Attorney’s Office, Fire Companies, and the Department of Emergency Services. The students also take a ride-along with an officer for firsthand experience with an officer's job. Residents are highly encouraged to take part in this valuable program. Please watch for upcoming details on our Fall 2019 enrollment.

Police Summer Camp Kids Camp
Summer camp was a huge success in June 2018. This popular program will take place again this year from June 24-28.
The Public Works Department is comprised of 26 employees who are responsible for all Township owned roads, buildings, parks, open spaces, sanitary and storm sewers.

We also coordinate community events, summer and winter recreation programs, as well as rental of Township facilities.

In 2018, the Township paved 29 roads. With the addition of our hot asphalt transporter, we were able to fill 729 pot holes with a hot material and not have to dispose of any extra.

With the replacement of the boom mower, we are now able to use it in the colder months.

We also upgraded our brine system with a larger tank, upgraded mixer, and a second pump to allow trucks to continually brine the whole Township in half of the time.

Parks and Recreation

The summer recreation program had 600 campers, winter recreation had 650 campers. There were 13 offered sports program and 5 summer concerts in Wilson Farm Park.
Sewer Department

The sewer department maintains 7 pump stations as well as approximately 170 miles of underground sanitary sewer pipe. Although most sanitary sewer lines are in the roadways, there are still miles of pipe that are in remote locations. The Sewer Department uses a variety of equipment to access and maintain them.

In August, the Public Works Department responded to numerous locations responding to damage from flooding during a severe storm.

- Channel and culvert filled with trees and debris washing out the roadway.
- Roadway with rocks and dirt washing over the culvert.
- Tory Hill storm pipe with two head walls lifted out of the ground.
- Exposed sanitary pipe.
