Message from the Township Manager

On behalf of the hard working Tredyffrin Township staff and the Board of Supervisors, I am pleased to present the 2019 Annual Report. This report is a culmination of the work that was completed in 2019 and provides you, our residents, with insight into the various departments.

The Township ended 2019 in a period of transition with three new Supervisors and the building under renovation. During this renovation, the Board and staff have worked to ensure there is no disruption of services and communication. We expect to be back in the newly renovated building sometime in late 2020. These renovations will address some long overdue maintenance items including electrical, plumbing, and HVAC.

It has been my honor to serve as Township Manager and work with some excellent elected officials. Without the support and direction of the Board of Supervisors, we could not accomplish all that we do each year.

Tredyffrin Township continues to make great strides in providing outstanding services while balancing the cost to our residents and businesses. For the first time in many years, with the leadership of the Board of Supervisors, new bonds were issued to address parks, stormwater, bridges, and other projects. These funds will enable us to immediately begin work in 2020 on many of the initiatives.

Each of our departments handles a wide array of issues each year. From addressing new development and inspections, applying for grants to extend Township investments, inspecting bridges, community policing to responding during and after major storm events, your staff is constantly working to make Tredyffrin Township a special community. There is never a day that I am not impressed by the professionalism and dedication of all the Township employees.

Please take the time to review the great accomplishments of Tredyffrin Township in 2019. We welcome your input and feedback as we move forward in 2020.

For more information on any of the departments or services Tredyffrin Township provides, please call us at (610) 644-1400 or visit www.tredyffrin.org.

William F. Martin
Thank you to our Elected Officials and Volunteers!

BRIDGE PROJECTS

Howellville Road Bridge
In 2019, work continued on a project that includes removal and replacement of the existing roadway bridge over the Norfolk-Southern (N/S) railroad tracks near the Field of Dreams and Berwyn PECO complex along Howellville Road. Final design was completed and approved by N/S and PADOT. Agreements were finalized with PECO for advanced pole and utility line relocations. The Township also received structural adequacy approvals from PADOT, a Public Utilities Commission (PUC) Final Secrerial Letter for the Project, as well continued working with N/S railroad to obtain the N/S approvals for the Final Bridge Replacement Design Plans and Agreements. The Township advertised and awarded the contractor for the construction phase of the project to Lobar Site Development Corporation. Construction NTP was issued in January 2020, and work is expected to continue throughout the 2020 calendar year. The project is funded by the Municipal Bridge Retro-Reimbursement Program (MBRP) from the DVRPC and PADOT, as well as funds from the Township and N/S. Once completed, the new bridge will provide a wider bridge deck with two minimum 10-ft lanes, and two 5-ft shoulders (30-ft in total) versus the existing 19.5 ft. width which will allow for safer movement of motorists, bicyclists, and other users. In addition, the Township worked with PADOT and Tioga County and will transfer the existing bridge trusses to Tioga County for reuse in a future trail bridge project.

Drummers Lane Bridge
Planning, design and permitting started on the Drummers Lane Bridge Replacement Project in the Glenhardie area of Trout Creek. Preliminary design was completed in 2019, and final design and permitting are expected in 2020, as well as coordination with surrounding properties owners who will be affected by the roadway closure during construction. The Township will work to finalize the bridge plans and permits and utility coordination in 2020, and advertise and receive bids for construction. Construction is expected to begin and be completed in 2021. Several scour critical bridges were inspected following the June 20, 2019 storms which caused these structures to be over-topped and submerged with stream flow. Staff also continue to coordinate with PADOT as they continue design work on the proposed Darby Road Bridge and intersection improvements planned to begin in Paoli in mid-2021.

Responsibilities
The Engineering Department responsibilities include providing engineering technical knowledge, expertise, and assistance to all departments, the Township Manager, and the Board of Supervisors. The department manages and oversees a variety of functions from permitting/inspections (stormwater and grading, Municipal Separate Storm Sewer System (MS4), sanitary sewer planning, land development project inspections, etc.), to capital infrastructure projects, as well as ordinance development (stormwater, floodplain, etc.), grant procurement, attendance at public meetings, resident inquiry/complaint investigation/follow-up, expert testimony, and other various Township-related engineering efforts. In addition to daily responsibilities, such as issuance of 53 Stormwater and Grading Permits, and review of 87 Permit Exemption requests, as well as numerous construction inspections, the department started and/or completed several capital infrastructure projects in 2019.
TOWNSHIP SANITARY SEWER PUMP STATION REHABILITATION PROJECTS

In 2019, construction began for the major upgrade and rehabilitation of the Station Avenue Pump Station in Berwyn. This is one of the Township’s older pump stations and the proposed project will provide a number of upgrades to the station, including new pumps, electrical equipment and internal components at the station. The Township obtained an easement from the adjacent property owner to allow temporary construction activities to occur and formalize the PS within a Permanent Sewer Easement. Township staff worked with our sewer consultant to oversee the construction of these pump station improvements. Construction is expected to be completed in early 2020, with startup of the PS to follow. In addition to the Station Avenue Pump Station, work began on preliminary design for rehabilitation work on two other Sanitary Sewer Pump Stations in 2019 - Lancaster Avenue and Glenn Avenue Pump Stations. Groundwater infiltration testing and monitoring has completed. Final design and permitting are expected to be completed in 2021 for these two sites. The pump station rehabilitation projects will provide the Township with improvements and better operational controls at our pump stations, as well as reduce the frequency of routine and emergency maintenance currently required at these older facilities.

STORMWATER INSPECTIONS AND DAMAGE ASSESSMENT FROM ABNORMAL RAINFALL

In 2019, the Township once again experienced an abnormally wet year with over 52-inches of rainfall recorded at the Valley Creek USGS Gage near Valley Forge Park. This is after over 71-inches of rainfall in 2018. Typically, the Township experiences about 42-inches of rainfall on an average year. The rainfall early in the year through early August seemed relentless and unyielding and, although we had some drier times in the fall, rainfall remained higher than average. Heavy rainfall impacted infrastructure, roadways, and properties throughout the Township. Several stream culverts, roadways, and properties experienced flooding and erosion during the extreme storm experienced on June 20, 2019. Emergency repairs were made on a number of storm inlets and drainage systems, as well as repairs to roadways following the summer storms. Engineering worked closely with Public Works as they responded to numerous repairs to sanitary sewer and storm pipe infrastructure impacted by the storms in 2019. Design work began on the Hillside Road Drainage Improvement Project and the Woodland Road stream culvert emergency replacement project, both slated to start and be completed in 2020.

TROUT CREEK EMERGENCY SEWER ENCASEMENT AND STABILIZATION PROJECT

Staff worked with our sewer engineer after heavy storms eroded and uncovered two sections of Township sanitary sewer line within Trout Creek near Thomas Road. Exposed sewer lines were threatened from debris and stream flows and required immediate attention. Concrete encasement and rock rip-rap stabilization were designed and installed in two locations. The project required permits from PADEP, as well as several resident easements to access the exposed sanitary sewer lines and stream bypassing. All disturbed areas were seeded and stabilized with straw or matting following completion of construction.
The mission of the Finance Department is to lead the Township’s financial management efforts to best serve the public, Board of Supervisors, and all Departments of the Township. We serve as a central hub for financial information involving Township business in a timely, efficient, and effective manner. The department provides reports, maintains documentation, and ensures the integrity and accuracy of the financial transactions in accordance with Generally Accepted Accounting Principles (GAAP), Township ordinances, state statutes, and federal laws.

**FUND BALANCE**

For the year ending December 31, 2018, the Township maintained an “Unassigned” Fund Balance of $18,203,583, which represents 83.7% when viewed as a percentage of the total 2020 Budgeted Expenditures. The Township has a Fund Balance Policy goal of 35%. The Board continues to discuss ways to implement a long-term plan to get the Township within policy. From a practical standpoint, this illustrates the Township’s ability to manage annual expenses with long-term financial stability.

**BUDGET PREPARATION**

The Finance Director worked closely with the Township Manager and Board of Supervisors to prepare the 2020 Operating Budget and the 2020-2024 Capital Plan. The budget serves as the guide for the Township’s overall operations and delivers transparency and accountability to our residents and businesses. The General Fund Operating Budget for FY2020 is $23,234,090. The 2020 General Fund Budget included a tax increase for the second straight year. The tax increase totaled 3%, raising the millage rate to 2.5 mils. Even with a small tax increase, the Township’s portion of a resident’s overall tax bill remains at 8%. The average 2020 real estate tax bill for a residential property is $571.43.
2019 ACCOMPLISHMENTS

The Township issued $7 million of Series of 2019 General Obligation Bonds. This was the first “new money” bond issuance over a decade. Funding is going to support capital projects in our parks, a renovation of the Township building, stormwater, and other infrastructure projects to name a few. On a personal note, the Finance Director received the Main Line Chamber of Commerce’s 2019 CFO of the Year award.

CURRENT PROJECTS

Together with Erin McPherson of the Engineering Department, Finance Director Joe DiRocco is managing the renovation of the Township Building project. Construction is expected to last until late summer. Mr. DiRocco is also involved with the Wilson Farm Park Master Plan update which is expected to be approved by the Board of Supervisors in March 2020.

GOALS

In addition to continuous process improvements, it is the goal of the department to prepare a Comprehensive Annual Financial Report (CAFR) to present to the Board of Supervisors and GFOA. Preparing a CAFR represents the highest level of financial reporting for municipalities and we are hopeful to accomplish this goal within the next couple of years.
In addition to our daily responsibilities, the IT Department completed various projects in 2019, of which included:

The first project was transitioning from Manager Plus to Fleetio, which is a better fleet management tool. Unlike our previous solution, Fleetio ties into our Verizon GPS system so mechanics receive up to date mileage and service alerts for vehicles. As the mechanics get more accustomed to using the software and enter in more data, managers should be able to determine true cost of maintaining vehicles.

The second project involved both the mechanics and Public Works employees. We purchased and configured tablets in accordance to their software needs. For example, mechanics are utilizing tablets with Fleetio, while Public Works are using their tablets with ESRI Collector. ESRI collector was obtained in 2019 to allow employees to use web maps to capture and edit data to integrates into our ArcGIS solution. This will allow the Public Works department to accurately mark locations of assets like manholes for history. This is the first step towards using a GIS centric solution to help the Public Works department keep track of history and repairs.

The third project involved the purchase of Toshiba copiers and Papercut software. This has benefited us in in various ways. For example, we can accurately calculate usage by departments or by users. Users print jobs are secured so we can cut down on local printers for users that need private printing. We have cut down on service calls.

Responsibilities

The responsibilities of the IT Department include maintaining the network infrastructure, which consists of multiple servers and client workstations. In addition to this, we maintain the VOIP system, police MDVR system, AV equipment, security system, and anything technology related. This would include rendering support to the end users when it comes to their software and printer needs.
Tredyffrin Township Television (TTTV) operates its own PEG Television channels and facilities. This includes equipment and programming for Comcast and Verizon TV channels, as well as a video-on-demand website. The studio exists to provide Tredyffrin Township residents with the tools and training needed to communicate with their neighbors via television and video-on-demand available online. The franchise agreements in place with local cable providers fund TTTV.

TTTV purchased the FCP X Mac Pro Editing Suite as a replacement of our 2013 editing system. It included an Apple Mac Pro computer, RAID storage, source media storage, a backup drive, displays, and editing software.

Two new TTTV series premiered in 2019 - Esther in Chester, a health-oriented advice show by internist Dr. Esther Estes, and Modern Machinima, a series by artist Lyn Thompson that focuses on the art created by--and the remedial benefits resulting from--virtual world technology.

Our recording and production of the Diwali Celebration at the Tredyffrin Library looks like it may also result in a production by our Indian community in 2020. Several attendees expressed interest - two of whom have already registered for Spring certification classes.
The Libraries support diverse interests and continually refine collections, services, and programs to meet the changing needs of the community. In 2019, a total of 383,786 items were borrowed; 1,763 programs were offered; and 31,832 program attendees were recorded.

In 2019, Tredyffrin Public Library opened seven days a week and added a full-time librarian to facilitate a variety of new programs. Paoli Library built a robust teen program and many teens now look to the library as a primary space for gathering with friends. Both libraries added new items to the collection, and, thanks to the Friends of Tredyffrin Public Library, began to update and replace some furniture, carpeting, and other amenities in the Children’s Department.

Tredyffrin Public Library also received a Keystone Grant for 2020 to replace the main floor lighting with energy efficient LED lighting. Paoli Library, thanks to the Friends of Paoli Library and some generous donors, completed some space updates to make the “biggest little library” more conducive to working and gathering.

Responsibilities

The Tredyffrin Township Libraries offer resources and services for all those interested in learning and discovery. They provide access to a wealth of on-site resources and all library users have access to materials held by any one of the sixteen libraries within the Chester County Library system. In 2019, visits to Tredyffrin Township Libraries totaled 225,235.
NOTABLE 2019 ACCOMPLISHMENTS

General

Opened the Tredyffrin Public Library 7 days a week

Achieved “Gold Star Library” status in the PA Forward Star Library Program, a program that recognizes and exemplifies programming and services focused on five literacies: basic, civic and social, information, health and wellness, and financial

Offered prominent local author speaking events

Children’s

Offered a successful Summer Reading Program for kids incorporating reading, attending programs, and activities. Paoli Library continued participation in the Willistown GoWilma! Program

Continued outreach efforts with local schools

Teens

Hosted theatrical and musical performances including a Performance Art Summer Camp, a summer theater production, and an extra teen-run production for the end of 2019

Continued the “Understanding and Demystifying College Admissions” annual workshop and Girls Who Code workshops

Continued our annual college essay application workshop

Adults

Hired a new Adult Programs and Community Outreach Librarian to develop partnerships with local organizations and to expand the number and type of adult programs

Continued and expanded health and wellness programs such as yoga and meditation taught by local instructors at little or no cost to participants

Continued our partnership with Chester County SCORE to offer a variety of programs, workshops, and general assistance to small business owners and entrepreneurs.

LAND DEVELOPMENT

400 Swedesford Road

Developer Echo proposed the demolition and redevelopment of the C-2 Commercial zoned 7.2 acre shopping center into a four story, 76,689 square foot multi-family building with a four level 32,718 square foot garage. Accompanying the building would be the installation of driveways, utilities, landscaping, and stormwater management controls necessary to support the development.

675 E Swedesford Road

Developer Equus received final land development approval in June 2019 for its proposed five story, 146,290 square feet office building, located in O - Office and Trout Creek Overlay Districts. As of print, no tenant has signed a long-term lease, nor has a construction date been set.

750 Swedesford Road

This property was previously approved as Lifetime/Children’s Learning Adventure (CLA). Since CLA unfortunately declared bankruptcy after the plan was approved, Lifetime took the opportunity to reimagine the space as a shared work office space. The current development is proposing approximately 45,196 square foot building and associated parking in place of the CLA project. The new site will consist of the installation of additional parking areas, utilities, landscaping, and stormwater management controls. General site improvements remain per the original approval, but the impervious coverage is reduced.

Russell Road

Alterra Group proposes to redevelop the C-1 Commercial zoned 5.01 gross acre property to include the demolition of two existing office buildings and the consolidation of three separate parcels for construction of a three-story, 116-unit Assisted Living Facility. The property is presently improved with two multi-story office buildings and associated off-street parking facilities. Final Land Development was granted on November 21, 2019.

Responsibilities

Tredyffrin Township works within the prescribed measures of the Zoning Code and Subdivision and Land Development Ordinance to create and maintain a diverse, attractive, and welcoming community for residents, employees, and businesses. These codes, adopted by the Board of Supervisors, ensure that development is done in a safe and sustainable manner. Daily responsibilities for the department include permitting, code enforcement, right-to-know requests, and assisting residents and developers with land development questions and applications. In combination, these roles make Tredyffrin the thriving community that it is today.
COMMUNITY DEVELOPMENT

Warner Spur Master Plan
Staff worked alongside Chester County, its consultant McMahon Associates, and other stakeholders to create a master plan for the Warner Spur, a crucial link that would work as a connector between the Chester Valley Trail and Devault Trail.

Regional Streetlight Procurement Program
The Township engaged Keystone Lighting Services (KLS) through the Delaware Valley Regional Planning Commission (DVRPC) for the Regional Streetlight Procurement Program (RSLPP). KLS audited the Township’s streetlight and traffic signal infrastructure and created a design proposal for upgrading the technology to LED lighting. Construction is expected to start mid-2020.

Curb My Clutter
In January 2019, the Township signed an agreement with Curb My Clutter, a clothing and electronics recycling company that picks up at your residence, to participate in its pilot program. Throughout 2019, now rebranded as Retrievr, the program served over 140 residences and diverted over 10,000 lbs. of waste from landfills. Tredyffrin Township and Retrievr will continue to partner through 2020.

PERMITTING

A building permit is an official approval issued by the local government agency that allows you or your contractor to proceed with a construction or remodeling project on your property. It is intended to ensure that the project plans to comply with local standards for land use, zoning, and construction. For the year ending 2019, building permits issued totaled 2,678, almost matching the total in 2018. Construction value of these permits totaled almost $130 million (not quite double the 2018 $69 million total). This was another great year of dollars continuing to be invested in the Township which shows a commitment to the health of the economic environment within our borders.

ZONING

Historic Ordinance
The Tredyffrin Township Historical Commission proposed an update to Chapter 208 – Article XXIVA Historic Resource Overlay District in the Township’s Zoning Code to better preserve and protect its significant historical resources. The draft ordinance would require approximately 70 properties to follow specific guidelines regarding property use and demolition. In November 2019, the ordinance was brought to the Planning Commission for its review. The Planning Commission recommended the ordinance be further reviewed and altered before it goes to the Board of Supervisors for adoption. There are currently no updates on its progress.
DEPARTMENT STAFFING & STRUCTURE

The Tredyffrin Township Police Department is comprised of 42 sworn personnel supported by 6 full-time civilian staff members. Led by Superintendent T. Michael Beaty, the members of the department are dedicated to providing quality law enforcement services to the citizens of our community while adhering to the highest ethical and professional standards. The department consists of 4 basic sections:

- The Patrol Division, the largest division and most visible section within the department, providing service 24 hours a day, 7 days a week. Its members have the duty to patrol the Township and enforce the law on a daily basis.
- The Detective Division is comprised of highly experienced investigators, each bringing a unique investigative specialty such as identity theft, drug investigations, juvenile crimes, or domestic abuse. Its members have the duty of investigating crimes that occur within the Township.
- The Traffic Safety Unit surveys complaints of unsafe conditions on all public roadways in the Township. Its members have the duty of enhancing the safety of motorists and pedestrians in Tredyffrin Township.
- The Community Policing Unit is dedicated to the care and handling of community specific requests and investigations. The Unit works collaboratively with multiple county and state agencies to provide positive outcomes for Township residents who are trying to navigate complex and emotional life issues. Its members are committed to crime prevention and pay close attention to crime trends and current prevention methods.

In a high tech and ever changing world, educating our community is essential in reducing the chance of being a victim of a crime.

In 2019, the department handled 22,410 documented calls for service, including 461 criminal arrests, 3,680 traffic arrests, 926 crashes and 106 DUI arrests. The daily interactions with community members and diligent enforcement efforts are a testament to the quality and caliber of the talented individuals that make up the Tredyffrin Police Department.

Responsibilities

“The core values of the Tredyffrin Township Police Department are built on a foundation of professionalism, respect and honor in conjunction with our community-oriented policing philosophy. The collaborative partnerships we have formed are crucial in providing for the safety and well-being of all that live in, work in and visit Tredyffrin Township.”

Superintendent T. Michael Beaty

SUMMER KIDS CAMP

Introducing kids to police at a young age is a great way to build up a positive relationship between community members and law enforcement. Luckily, the Tredyffrin Township Police Department offers the perfect opportunity for kids to be introduced to law enforcement in a fun, positive way.

The Department’s Summer Camp lets Tredyffrin Township kids ages 9 to 14 get familiar with the men and women in the department through interactive activities and demonstrations. Kids get to see police and emergency responder demonstrations, partake in physical challenges, get team building lessons, and learn about bomb squad, K9, SWAT, and other police specialties.

This past summer’s camp was another HUGE success, and we look forward to next summer’s being even bigger!

CITIZENS’ POLICE ACADEMY

This past fall we hosted our 19th annual Citizens Police Academy, culminating with a graduation ceremony in December. Academy course highlights this year included classes in criminal investigation, patrol procedures, domestic violence awareness, DUI and drug investigations, traffic law enforcement procedures, and a tour of the Chester County Department of Emergency Services.

Open to Township residents, this annual program is an integral part of our Community crime prevention initiative. By increasing understanding between citizens and police officers through training and open communications, citizens promote community involvement - which is one of the most powerful forces any law enforcement agency has in the fight against crime!

COMMUNITY ENGAGEMENT

The Police Department regularly provides information to engage with members of our community through the use of social media. Utilizing all 4 major platforms: Facebook, Twitter, YouTube and, new in 2019, Instagram, we effectively communicate and interact with members of our Community on a daily basis.

With over 6,000 followers combined, our reach has grown exponentially since we started this vital initiative in 2016 and we’re looking forward to an even stronger year in 2020.
Public Works

PARKS AND RECREATION

PARK PROGRAMS
Summer recreation program had 632 campers.

Winter recreation program had 303 campers.

There were 12 offered sports programs and 5 concerts in the park and 134 pavilion rentals.

COMMUNITY EVENTS

Party in the Park
Our annual Community Day event gives residents the opportunity to interact with their neighbors and vendors.

Fourth of July Celebration
Each Fourth of July, the Township hosts a fireworks celebration in Wilson Farm Park.

Summer Concert Series
In the summer of 2019, the Township hosted 5 concerts in Wilson Farm Park.

Responsibilities

The Public Works Department is comprised of 24 employees who are responsible for all the Township owned roads, buildings, parks, open spaces, sanitary and storm sewers. We also coordinate community events, summer and winter recreation programs, as well as rental of township facilities.
