Re: Valley Creek Truck Sewer Capacity Expansion – Phase 1

Dear Resident:

Tredyffrin Township, in conjunction with the Charlestown Township, Easttown Township, East Whiteland Township, Malvern Borough, Willistown Township and the Valley Forge Sewer Authority have recently completed an Act 537 study of the Valley Creek Trunk Sewer. The Act looks at the sanitary sewer system for capacity deficiencies so the municipalities can plan for ways to correct the problems to prevent future issues. The study indicated that there were sections of the sewer pipe that were inadequate and needed to be upgraded. Currently, the Township is working with Buchart Horn, Inc for the design and permitting of Phase 1 of the upgrades. The Township does not anticipate the construction phase to begin until approximately the fourth quarter of this year.

The Township would like to make you aware of this project well in advance specifically because sections of the pipe that are scheduled to be upgraded in Phase 1 are located on your property. As the Township continues to work on the design, additional construction details will be worked out. Any of the areas that are disturbed as part of the construction project will be restored.

The Township will send additional notifications as we move closer to the anticipated start of construction. At this time, the Township would only like to make you aware of the project. We encourage you to contact us if you have any questions. The Township Engineering Department can be reached at (610) 644-1400 or EngineeringDept@tredyffrin.org. In addition, to stay informed with all Township activities, we encourage you to send your email address to tredyffrin@tredyffrin.org to sign up for our monthly e-newsletter.

Very truly yours,

Stephen Burgo, P.E.
Township Engineer
